AI Infra Summit Hackathon

Build production-grade AI applications on the modern AI infrastructure stack

🌐 Hybrid Hackathon | 💻 Online Build: September 10–16, 2026 | 📍 On-site: September 15–17, 2026

The official hackathon of AI Infra Summit — co-organized by Kisaco Research and lablab.ai.

Build production-grade AI applications on the modern AI infrastructure stack, alongside 8,000+ attendees, researchers, founders, and infra leaders.

📍 **On-site Venue (September 15–17):**
Santa Clara Convention Center

How to Join

On-site

Santa Clara

IMPORTANT:

Create your team on lablab.ai and add your project idea as early as possible.

We use your idea to match and allocate your team to the most suitable on-site track, so make sure it's included in both your Team Description and the Confirm & Apply for Track Form.

1

Sign up

Register on the Event Page and select that you're interested in joining on-site.

2

Create or join a team

Everyone needs a team on lablab.ai to submit a project. Teams can have 1–5 members. Hacking solo? Create a one-person team. Create your team as early as possible. You can change your Team Name and Description at any time.

3

Check your inbox

We'll email interested participants with a Confirm & Apply for Track Form. Check your spam folder too!

4

Confirm & apply for a track

Fill out the form to confirm your on-site participation. Before submitting:

Approved

2770 

Team Dashboard

- **Team Leaders:** select your team's track preferences. You can find all track descriptions here on the Event Page under the Tracks section.

We'll review your project idea and preferences, assign your team to an on-site track, and email you with the next steps.

If you have any questions or need to update anything, contact us at coordination@lablab.ai.

Team Dashboard

POWERED BY

The AI Infra Summit Hackathon brings together developers and innovators building on top of the **modern AI infrastructure stack**.

Whether you're creating AI agents, developer tools, data systems, model-powered applications, or infrastructure-enabled products, this hackathon is designed to showcase what's possible when builders have direct access to the technologies powering the AI industry.

On-site

DATES

September 15–17, 2026

LOCATION

Santa Clara Convention Center, CA

- Build at AI Infra Summit with **partner hardware in the room**
- **Assignment required** — teams submit an onsite track preference and are assigned to one track
- **Invitation only** — travel and accommodation expenses are not covered

Online

DATES

September 10–16, 2026

LOCATION

Global

- Build on the **lablab.ai platform** and the lablab.ai Discord server
- **Open build** — online tracks don't require assignment
- **Open to everyone** — regardless of previous AI or coding experience

PARTNERS

The Technology You'll Build With

Some of the biggest names in AI infrastructure are joining us for the AI Infra Summit Hackathon. Expect serious technology, ambitious challenges.

intel
robotics

Intel joins the hackathon with a focus on robotics and physical AI, exploring how intelligent systems can move beyond the cloud and into the physical world. The track brings together AI, computing, and real-world applications.

[Intel](#)[OpenVINO](#)Qualcomm

Qualcomm joins the hackathon with a focus on on-device AI and the Snapdragon ecosystem, exploring what becomes possible when intelligence runs closer to the user. Builders can experiment with new approaches to local AI and next-generation computing.

Approved

2770 [Team Dashboard](#)

[Qualcomm Device Cloud](#)[Qualcomm Developer Home](#)

SiMa.ai brings a physical AI perspective to the hackathon, focused on intelligence operating closer to the devices and environments where data is created. Builders can explore new ideas across edge AI and real-world applications.

[SiMa.ai Website](#)[Developer Portal](#)[Example Applications](#)[SiMa.ai GitHub](#)

Speechmatics brings voice AI into the mix, giving builders new ways to create applications that work with spoken language. From voice-enabled agents to real-time experiences, speech becomes another interface for building with AI.

[Speechmatics Tech Page](#)[Speechmatics Website](#)[Documentation](#)[Code Resources](#)

Snapdragon and Qualcomm branded products are products of Qualcomm Technologies, Inc. and/or its subsidiaries.

team that made it. Onsite tracks require assignment ahead of time; online tracks are open build. 🚀

Track Selection Process:

- 1 Create Your Team.** Form your team as soon as possible. Onsite track assignment is only made for participants who are part of a team. Head over to the lablab.ai Discord server to connect with others — we'll also run Team Match-Making rounds ahead of the hackathon.
- 2 Submit Your Team's Onsite Track Preference.** Only required for teams pursuing an **onsite** track. Team leaders submit the Track Selection Form on behalf of the team, listing all members and their preferred onsite track. Each team will receive confirmation of their assigned track.
- 3 One Onsite Track Per Team.** Teams building an onsite challenge may only be assigned to **one** onsite track. Online tracks don't require assignment — build with any online track's technology directly.
- 4 Onsite Eligibility.** Only teams working within their assigned onsite track are eligible for onsite participation at the AI Infra Summit.

⚠️ **TBD** — exact onsite capacity, the Track Selection Form link, and the submission deadline are still being finalized and will be communicated before the hackathon.

Qualcomm branded products are products of Qualcomm Technologies, Inc. and/or its subsidiaries.

Please note: participation in lablab.ai hackathons is voluntary. Prizes and opportunities depend on eligibility, availability and third-party sponsors. Hackathon rules, prizes and terms may change or be canceled at our discretion. Submissions must be original and MIT-compliant. Prize distribution may take up to 90 days. [Full details](#).

GUIDELINES

Guidelines

WHERE AND WHEN

The hackathon runs September 10–17, 2026. The online build takes place on the lablab.ai platform and the [lablab.ai Discord server](#). The on-site phase is held at the Santa Clara Convention Center during AI Infra Summit, September 15–17.

On-site participation is by invitation only. Travel and accommodation expenses will not be covered.

HOW TO PARTICIPATE

Register on both the lablab.ai platform and the [lablab.ai Discord server](#) in order to participate. To join, click the Enroll button at the bottom of the page and read the [Hackathon Guidelines](#), the [Getting Started Guide](#) and the [lablab.ai Hackathon Rule Book](#).

Everyone is welcome to participate, regardless of previous AI or coding experience.

Before the kickoff, browse the [AI Tech](#) and [tutorials](#) pages to read up on the available technologies and get a head start on your project.

TEAMS

Teams consist of 1–5 people. If you don't have a team, don't worry. You can connect with other participants from all over the world on the dashboard or on the [Discord](#).

WHAT TO SUBMIT

Basic information

- Project title
- Short description
- Long description
- Technology & category tags

Cover image and presentation

- Cover image
- Video presentation
- Slide presentation

App hosting and repository

- Public GitHub repository
- Demo application platform
- Application URL

JUDGING CRITERIA

Application of Technology

How effectively the chosen model(s) are integrated into the solution.

Presentation

The clarity and effectiveness of the project presentation.

Business Value

The impact and practical value, considering how well it fits into business areas.

Originality

Approved

2770 

Team Dashboard

The uniqueness and creativity of the solution, highlighting approaches and ability to demonstrate behaviors.

Partner tracks are scored against their own published rubric in addition to these criteria — see the Hackathon Tracks section.

Community & Social Channels

Stay connected with the teams behind the hackathon and follow along for updates, highlights, and future opportunities.
